Profile

B.Tech Information Technology student with hands-on experience in full-stack web development (MERN stack) through academic projects and an industry internship. Able to handle projects from start to finish—from backend logic and REST API development to frontend integration and delivering responsive web applications. Comfortable building scalable applications, implementing role-based authentication, and leveraging foundational AWS knowledge to solve real-world technical problems. Eager to learn new technologies, refine problem-solving skills, and develop reliable, production-ready applications.

Technical Skills

Programming Languages: Java, JavaScript, Python, SQL

Core Concepts: SDLC, OS Fundamentals, Object-Oriented Programming (OOP), Software Testing

Tools & Platforms: Git, GitHub, VS Code, RESTful APIs, AWS

Web & Data Technologies: HTML, CSS, React.js, Node.js, MongoDB, MySQL

Experience

Hindalco Industries Limited

May 2024 – June 2024

Summer Intern – Information Technology

- Responsible for the coding, realization, and test of an industrial maintenance subsystem used by **50+ workers**.
- Supported issue investigation, complaints handling, and the complete life cycle of software development to improve system reliability.
- Combined existing modules into cohesive components, integrating frontend features with RESTful APIs on a Windows-based environment.
- Collaborated effectively in a team setting, demonstrating quick learning and adherence to strict **SDLC** practices.

Projects

CampusHive – Smart Campus Event Management System | *MERN Stack*

Feb 2026 – Mar 2026

- Owned end-to-end delivery of a customer-facing event management platform using React, Node.js/Express, and MongoDB, managing the full lifecycle from design to ongoing support.
- Engineered automated Node.js workflows for approval routing and notifications, significantly improving operational efficiency.
- Built analytics dashboards integrated with backend APIs to surface attendance, registration, and engagement data.
- Developed JWT role-based access control (Admin, Organizer, Participant) and a QR-based attendance system with automated PDF certificates.

Industrial Maintenance Management System | *React.js, JavaScript, REST APIs*

May 2024 – July 2024

- Developed a centralized web portal using React.js and REST APIs to manage machines, maintenance tickets, and safety incidents for **50+ active workers**.
- Implemented secure role-based workflows for ticket creation, assignment, and status tracking, streamlining maintenance operations.
- Integrated frontend data collection forms with backend REST APIs, incorporating rigorous state management and error handling.

Certifications and Activities

- Gemini Certified Student – Google for Education (May 2026):** Demonstrated the knowledge, skills, and basic competencies needed to use Google AI.
- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate (Oracle University, 2026):** Certified in AI and cloud infrastructure foundations, with knowledge in scalable platform operations and technological competitiveness.
- GirlScript Summer of Code (GSSoC) – Open Source Contributor (2026):** Transitioned from academic projects to global open-source software contributions by collaborating on community-driven development initiatives.
- KIIT Fest – Event Organizer, School of Computer Engineering (2026):** Co-organized a technical event, demonstrating strong spoken and written communication skills and the ability to be a highly effective team player.

Education

B.Tech. Information Technology

Expected: May 2027

Kalinga Institute of Industrial Technology (KIIT), Bhubaneswar

CGPA: 8.40 / 10

Class XII (CBSE)

2023

Nirmala Convent High School, Renukoot

70.5%

Class X (CBSE)

2021

Nirmala Convent High School, Renukoot

90.2%
